

Advanced Power BI Exercise Cloud Coverage Matrix

Every hands-on exercise across all 11 training modules, cross-filtered against Azure Commercial, Azure Government (GCC High), and Azure DoD delivery — so a CSAM can scope a customer-ready agenda before the engagement, and instructors know exactly what to verify live in-tenant.

READY

Runs as-is in this cloud today under normal licensing and tenant settings.

VERIFY

May work, but the instructor must confirm live in the target tenant before relying on it — licensing, region, preview status, or capacity dependent.

NOT COVERED

Not expected to be available in this cloud. Deliver conceptually or substitute the documented alternate exercise.

How to use this matrix: Filter by target cloud to build a customer-specific agenda, flag every VERIFY item for the instructor to confirm in a pre-delivery tenant check, and swap NOT COVERED items for the suggested alternate before finalizing the statement of work.

Exercise-Level Cloud Coverage

Exercise	Commercial	Government	DoD
Module 01 · Advanced Semantic Modeling			
Build a star schema from a flat sales dataset	READY	READY	READY
Refactor a weak model into fact/dimension tables	READY	READY	READY
Add role-playing date dimensions	READY	READY	READY
Compare Import, DirectQuery, and composite models <i>Validate connector/gateway support in tenant</i>	READY	VERIFY	VERIFY
Hybrid tables & advanced incremental refresh <i>Requires Premium/PPU/Fabric capacity validation</i>	READY	VERIFY	VERIFY
Large semantic model handling <i>Capacity/licensing dependent</i>	READY	VERIFY	VERIFY
Module 02 · Advanced DAX			
Diagnose incorrect totals from context misunderstanding	READY	READY	READY
Build a measure branching pattern	READY	READY	READY
Create advanced time intelligence measures	READY	READY	READY
Build dynamic Top N / ranking visuals	READY	READY	READY
Optimize slow measures with variables	READY	READY	READY
DAX Studio external tool session <i>Local tool; Service/XMLA access depends on tenant policy</i>	READY	VERIFY	VERIFY
Module 03 · Advanced Power Query			
Build a staged Power Query pipeline	READY	READY	READY
Prove whether a query folds	READY	READY	READY
Convert repeated steps into a custom function	READY	READY	READY
Add parameters for dev/test/prod source switching	READY	READY	READY
Prepare a table for incremental refresh <i>Confirm refresh policy support in DoD capacity</i>	READY	READY	VERIFY
Cloud dataflows / Dataflows Gen2 <i>Fabric-dependent; typically unavailable in DoD</i>	READY	VERIFY	NOT COVERED
Module 04 · Report Design & UX			
Add drillthrough from summary to detail	READY	READY	READY
Build a bookmark-driven guided analysis	READY	READY	READY

Exercise	Commercial	Government	DoD
Create report page tooltips	READY	READY	READY
Design executive summary + analyst detail pages	READY	READY	READY
Create a mobile-optimized report layout <i>Validate mobile app policy for DoD users</i>	READY	READY	VERIFY
Personalized visuals <i>Depends on Service feature availability and tenant settings</i>	READY	VERIFY	VERIFY
AI-assisted / preview visuals <i>Often commercial-first; confirm before use</i>	READY	VERIFY	NOT COVERED
Module 05 · Performance Optimization			
Use Performance Analyzer to find slow visuals	READY	READY	READY
Reduce model size by lowering cardinality	READY	READY	READY
Use DAX Studio to compare measure performance <i>Local tool; Service model access depends on XMLA/tenant</i>	READY	VERIFY	VERIFY
Create an aggregation table over DirectQuery <i>Validate source/DirectQuery support</i>	READY	READY	VERIFY
Configure incremental refresh and test policy <i>Licensing/workspace/capacity dependent</i>	READY	VERIFY	VERIFY
Capacity metrics review <i>Telemetry availability varies by cloud/capacity type</i>	READY	VERIFY	VERIFY
Module 06 · Advanced Analytics & AI			
Build a what-if parameter scenario analysis	READY	READY	READY
Use decomposition tree for driver analysis <i>Not covered in Gov/DoD; treat as Commercial-only</i>	READY	NOT COVERED	NOT COVERED
Add forecasting to a time-series visual <i>Not covered in Gov/DoD; treat as Commercial-only</i>	READY	NOT COVERED	NOT COVERED
Key influencers visual <i>Not covered in Gov/DoD; treat as Commercial-only</i>	READY	NOT COVERED	NOT COVERED
Python/R visuals <i>Not covered in Gov/DoD; treat as Commercial-only</i>	READY	NOT COVERED	NOT COVERED
Azure Machine Learning integration <i>Not covered in Gov/DoD; treat as Commercial-only</i>	READY	NOT COVERED	NOT COVERED
Copilot / AI-assisted authoring <i>Treat as conceptual unless confirmed in sovereign tenant</i>	READY	NOT COVERED	NOT COVERED
Module 07 · Security Design			
Implement static and dynamic RLS	READY	READY	READY
Test RLS roles in Desktop and Service	READY	READY	READY
Demonstrate Build permission effects	READY	READY	READY

Exercise	Commercial	Government	DoD
Object-level security (OLS) <i>Often requires XMLA-compatible tooling and capacity</i>	READY	VERIFY	VERIFY
Add sensitivity labels <i>Requires Purview Information Protection configuration/cloud support</i>	READY	VERIFY	VERIFY
Review export/sharing governance settings <i>Confirm B2B/GCC High/DoD sharing policy</i>	READY	READY	VERIFY
Module 08 · Service Enterprise Deployment			
Publish a report and semantic model to a workspace	READY	READY	READY
Configure scheduled refresh and credentials	READY	READY	READY
Configure a gateway-backed data source	READY	READY	READY
Create an App with audience targeting <i>Confirm Service parity in target cloud</i>	READY	VERIFY	VERIFY
Configure deployment pipelines <i>Requires compatible licensing/capacity and Service availability</i>	READY	VERIFY	VERIFY
Promote/certify a semantic model <i>Requires tenant endorsement settings and governance process</i>	READY	READY	VERIFY
Module 09 · Monitoring & Governance			
Interpret usage metrics for a deployed report	READY	READY	READY
Troubleshoot a failed refresh	READY	READY	READY
Review tenant settings affecting export/sharing	READY	READY	READY
Inspect gateway status and data source mappings	READY	READY	READY
Activity logs and audit logs review <i>Requires admin permissions and audit configuration</i>	READY	VERIFY	VERIFY
Capacity metrics app walkthrough <i>Confirm for Premium/Fabric capacity type and cloud</i>	READY	VERIFY	VERIFY
Purview integration and DLP policies <i>Depends on M365/Purview cloud, licensing, tenant config</i>	READY	VERIFY	NOT COVERED
Module 10 · Premium, Fabric & Capacity			
Compare Pro, PPU, Premium, and Fabric capacity <i>Validate SKU, tenant, and cloud availability</i>	READY	VERIFY	VERIFY
Connect to a semantic model via XMLA endpoint <i>Requires compatible capacity and admin settings</i>	READY	VERIFY	VERIFY
Publish and manage a paginated report <i>Usually supported; validate cloud and licensing</i>	READY	VERIFY	VERIFY
Demonstrate Direct Lake / OneLake / Lakehouse concepts <i>Fabric service parity in sovereign clouds must be confirmed</i>	READY	VERIFY	NOT COVERED
Analyze capacity metrics and autoscale behavior <i>Validate availability and licensing before including</i>	READY	VERIFY	NOT COVERED

Exercise	Commercial	Government	DoD
Module 11 · Automation & DevOps			
Save a report as PBIP and review file structure	READY	READY	READY
Use source control to track report/model changes	READY	READY	READY
Deploy content using a scripted REST API approach <i>Validate endpoint/permission/service principal behavior in target cloud</i>	READY	VERIFY	VERIFY
Compare ALM Toolkit changes between model versions <i>Local tool; Service connectivity depends on XMLA/tenant policy</i>	READY	VERIFY	VERIFY
Git integration in Fabric workspaces <i>Do not require in Gov/DoD labs unless confirmed</i>	READY	NOT COVERED	NOT COVERED
Conceptual CI/CD pipeline (Azure DevOps/GitHub Actions) <i>Depends on network, identity, API endpoint, platform policy</i>	READY	VERIFY	VERIFY
Module CAP · Capstone: Enterprise-Ready Solution			
Full Gov-ready path (model, DAX, report, RLS, publish, refresh, App)	READY	READY	READY
Optional: Fabric Git integration, Direct Lake, Copilot, deployment pipelines <i>Optional commercial-enhanced path only</i>	READY	VERIFY	NOT COVERED
