Capstone solution build

WHO THIS TRAINING IS FOR

Enterprise BI teams, analysts, and platform owners working in commercial Microsoft 365 / Power BI / Fabric tenants who want to use the full breadth of current features, including Copilot, Fabric, and Direct Lake.

CURRICULUM AT A GLANCE

01**Advanced Semantic Modeling**

Star schemas, relationships, composite models, aggregations, and large-model design.

02**Advanced DAX**

Filter/row context, CALCULATE patterns, time intelligence, ranking, dynamic measures.

03**Advanced Power Query**

Query folding, parameters, custom functions, staging patterns, incremental refresh prep.

04**Report Design & UX**

Drillthrough, tooltip pages, bookmarks, navigation, field parameters, mobile & accessibility.

05**Performance Optimization**

Performance Analyzer, DAX Studio, VertiPaq concepts, cardinality and model tuning.

06**Advanced Analytics & AI**

What-if parameters, key influencers, decomposition tree, forecasting, AI-assisted insights.

07**Security Design**

Static & dynamic row-level security, object-level security, sensitivity labels, sharing controls.

08**Service Enterprise Deployment**

Workspaces, Apps, deployment pipelines, gateways, scheduled refresh at scale.

09**Monitoring & Governance**

Usage metrics, activity logs, admin portal, capacity metrics, adoption tracking.

10**Premium, Fabric & Capacity**

XMLA endpoint, Direct Lake, OneLake, paginated reports, capacity planning.

11**Automation & DevOps**

PBIP source control, REST APIs, service principals, Tabular Editor, CI/CD lifecycle.

Flexible Delivery Formats

Choose the depth that matches your audience — every format maps directly to the same 11-module curriculum.

1-Day Executive Briefing

6 HOURS · LEADERSHIP & ARCHITECTS

Guided tour of modeling, DAX, report UX, security, and enterprise delivery considerations. Demo-driven with a short applied exercise.

3-Day Standard Workshop

3 X 5 HOURS · REPORT AUTHORS & ANALYSTS

Hands-on Modules 1-7: modeling, DAX, Power Query, report UX, performance, analytics, and security, using the full lab set.

5-Day Extended Workshop

5 X 5 HOURS · BI DEVELOPERS & PLATFORM OWNERS

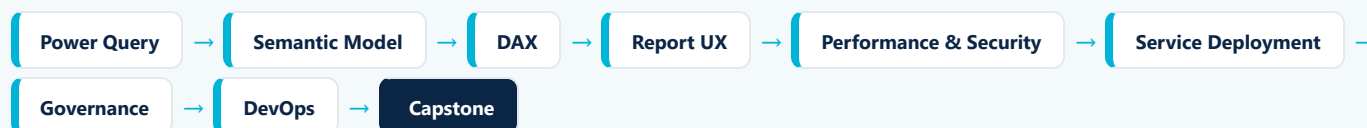

Full Modules 1-11 plus capstone: adds Service deployment, monitoring/governance, capacity architecture, and DevOps lifecycle.

Azure Commercial delivery notes

This track uses the full commercial feature set, including the newest previews such as Copilot, Fabric, and Direct Lake mode.

Track highlights for this cloud

- Microsoft Fabric, OneLake, and Direct Lake mode
- Copilot and AI-assisted authoring experiences
- Deployment pipelines and Git integration in Fabric workspaces
- Latest preview visuals and AI-powered analytics

Capstone: Enterprise-Ready Power BI Solution

Learners apply the full lifecycle end to end — an optimized semantic model, advanced DAX, an interactive report with drillthrough and mobile layout, static & dynamic RLS, Service publishing, scheduled refresh, and packaging as a governed Power BI App, all validated against Azure Commercial constraints.

Ready to schedule Azure Commercial delivery?

Delivered against standard commercial Microsoft 365 / Power BI / Fabric tenants.
