

Advanced Power BI Training Program

An 11-module, capstone-driven curriculum that takes report authors and platform teams from advanced modeling and DAX through enterprise deployment, governance, and DevOps — purpose-built for Azure Government (GCC High) delivery.

CLOUD TRACK: AZURE GOVERNMENT (GCC HIGH)

11

Core training modules

1–5

Day delivery options

40+

Hands-on guided exercises

1

Capstone solution build

— WHO THIS TRAINING IS FOR

Public sector, defense-adjacent contractors, and regulated-industry BI teams operating in GCC High tenants who need advanced authoring and governance skills validated for sovereign cloud constraints.

— CURRICULUM AT A GLANCE

01

Advanced Semantic Modeling

Star schemas, relationships, composite models, aggregations, and large-model design.

02

Advanced DAX

Filter/row context, CALCULATE patterns, time intelligence, ranking, dynamic measures.

03

Advanced Power Query

Query folding, parameters, custom functions, staging patterns, incremental refresh prep.

04

Report Design & UX

Drillthrough, tooltip pages, bookmarks, navigation, field parameters, mobile & accessibility.

05

Performance Optimization

Performance Analyzer, DAX Studio, VertiPaq concepts, cardinality and model tuning.

06

Advanced Analytics & AI

What-if parameters, key influencers, decomposition tree, forecasting, AI-assisted insights.

07

Security Design

Static & dynamic row-level security, object-level security, sensitivity labels, sharing controls.

08

Service Enterprise Deployment

Workspaces, Apps, deployment pipelines, gateways, scheduled refresh at scale.

09

Monitoring & Governance

Usage metrics, activity logs, admin portal, capacity metrics, adoption tracking.

10

Premium, Fabric & Capacity

XMLA endpoint, Direct Lake, OneLake, paginated reports, capacity planning.

11

Automation & DevOps

PBIP source control, REST APIs, service principals, Tabular Editor, CI/CD lifecycle.

Flexible Delivery Formats

Choose the depth that matches your audience — every format maps directly to the same 11-module curriculum.

1-Day Executive Briefing

HOURS SCOPED AT BOOKING · LEADERSHIP & ARCHITECTS

Guided tour of modeling, DAX, report UX, security, and enterprise delivery considerations. Demo-driven with a short applied exercise.

3-Day Standard Workshop

HOURS SCOPED AT BOOKING · REPORT AUTHORS & ANALYSTS

Hands-on Modules 1-7: modeling, DAX, Power Query, report UX, performance, analytics, and security, using the full lab set.

5-Day Extended Workshop

HOURS SCOPED AT BOOKING · BI DEVELOPERS & PLATFORM OWNERS

Full Modules 1-11 plus capstone: adds Service deployment, monitoring/governance, capacity architecture, and DevOps lifecycle.

Azure Government (GCC High) delivery notes

Every advanced feature is labeled Gov-ready, Verify with Instructor, or Not Covered so instructors and learners always know what to confirm in-tenant during delivery.

GOV-READY

VERIFY WITH
INSTRUCTOR

NOT COVERED

Track highlights for this cloud

- Feature-by-feature Gov-ready / Verify-with-Instructor labeling
- Dynamic RLS validated against Entra ID (Gov) identity formats
- Instructor-verified alternates for Fabric, Copilot, and AI visual features
- Sovereign cloud data residency and export-control awareness

Capstone

Capstone: Enterprise-Ready Power BI Solution

Learners apply the full lifecycle end to end — an optimized semantic model, advanced DAX, an interactive report with drillthrough and mobile layout, static & dynamic RLS, Service publishing, scheduled refresh, and packaging as a governed Power BI App, all validated against Azure Government (GCC High) constraints.

Ready to schedule Azure Government (GCC High) delivery?

Delivered with Gov-ready lab paths first; any feature not yet confirmed for this tenant is flagged for the instructor to verify live or substitute an alternate exercise.
